

Fired-On Images Decals on Metal Enamel

www.fired-on.com

1. Pick image and prepare enamel surface

2. Print image onto Fired-On Images Photo Fusing Decal Paper or Multi-surface Transfer Paper using ANY HP or Canon Black-ONLY Laser printer or copier.

3. Soak Decal in warm water until it begins to slide off of backing sheet

4. Pick up out of water with backing paper still attached and slide the image in place onto the enamel surface.

5. Remove ALL water and bubbles using a brayer (roler) over a soft paper towel is best. (do not use a squeegee)

6. Let dry thoroughly at least 2 hours

7. Fire in kiln at 1490 for 1- 1 1/2 minutes (until surface looks to have a sheen)

8. Let Cool and Enjoy

Image will fire to a lovely sepia brown color of image will be affected by the color it is fired onto. For black-er looking images use blue enamel.
